

Navis Capital Partners Announces Launch of Decarbonization Strategy in Southeast Asia

Singapore, Monday, 30 March 2026: Navis Capital Partners has launched the Navis Decarbonization platform, a dedicated private markets strategy to accelerate the low-carbon and climate-resilient transition of small and medium-sized enterprises (SMEs) in Southeast Asia. The platform will provide hybrid capital to growth-stage companies in energy access and power generation, low-emission transport, infrastructure and the built environment, and sustainable agriculture and water sectors.

Bridging the Financing Gap in Growth Stage Decarbonization-focused SMEs

Southeast Asia is facing the dual problem of rapidly rising emissions and acute climate vulnerability, where emissions are growing while populations face severe climate impacts, yet SMEs lack access to capital and technical capacity to deploy decarbonization and climate resilience solutions at scale.

“Through its local presence and track-record, Navis is uniquely positioned to support local companies focusing on decarbonization in Southeast Asia while delivering attractive risk-adjusted returns.” said Dato’ Sri Nicholas Bloy, Founding Partner at Navis Capital Partners.

About Navis Capital Partners

Founded in 1998, Navis manages over USD 5 billion in private equity and private credit capital and focuses on investments primarily in Asia. Navis contributes both capital and management expertise to a select number of well-positioned companies with the objective of directing strategic, operational, and financial improvements. Navis boasts one of the largest private equity professional teams in Asia, comprising approximately 100 professionals across seven offices in the region. Navis has a long and proven track record in pan-Asian private equity, with 88 control investments made across the Asian region completed since its establishment.
